

Deep-Pleated HEPA Filter

Long-life Use	Replacement interval: 12 months, reducing maintenance costs
Applications	Industrial, semiconductor, and biopharmaceutical applications
Frame Material	Aluminum frame
Filter Media	Fiberglass media
Efficiency	E11, H13, H14, U15, U16
Separator	Thermoplastic adhesive
Adhesive	Polyurethane (PU)
Fire Rating	UL900 certified
Temperature Resistance	≤70°C
Humidity Resistance	≤100% RH
Recommended Final Pressure Drop	≤500 Pa

Product Features

- Separator-free design cuts airflow resistance and energy use, lowering operating costs
- Compact and stackable for a wide range of applications, it saves valuable warehouse space
- Ultra-slim profile reduces the space required for installation

Initial Resistance vs. Airflow Curve
